

Dry Block Heater

This block heater is a convenient answer to the laboratory's need for a small constant temperature heater that can accommodate a variety of different sizes. Heater opening is a standard SBS format, which allows heating of standard well plates (low or high profile). Our block heater features a digital control with easy set-up and simple input commands; makes this control very "user friendly". This control is single-loop and auto-tuning that automatically set PID control parameters for optimum system performance. Maintains temperature from slightly above ambient to 125°C +/- 1°C.

Specifications

Electrical: On/Off power switch, fuse protection, 3-wire line cord with molded plug.

Accuracy: 0.1% of span.

Ambient Temperature Range: 32-149°F.

Display: Dual, 4-digit LED.

Set Point: Up/down keys. °F or °C display, user selectable.

Finish: Black
