iRoll PR35 (Digital Plate Rotator)

Digital Plate Rotator are an essential part of any laboratory setup. The usability of these devices is dependent on their performance and reliability which is unfortunately lacking in many mass-market plate rotators. Most of these devices come with poor internal components, especially the motor which leads to issues in performance as the motor is not able to provide the required level of mixing.

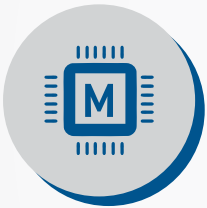

Neuation, with a dedicated R&D department invests in considerable research into user feedback and customers' requirements to design and develop a device which meets the expectations of users. With quality internal components including a powerful, maintenance-free brushless DC motor and class-leading features like power intermittent mode, user-programming feature, pulse mode etc. Neuation's iRoll PR35 delivers exceptional performance and complete reliability.

Product Features

Brushless DC Motor For Quiet And Maintenance-free Long Life.

Microprocessor Controlled Plate Rotator For Intelligent Performance With Last Run Memory Feature.

Variable Speed Setting From 10-80 RPM With Increments And Accuracy Of +/- 1 RPM.

Variable Timer Setting From 1 To 99 Minutes With An Infinite Mode

Pulse Mode Allows For Efficient Mixing With Alternating Clockwise & Anti-clockwise Motion With 2 Second Stops For Thorough Mixing.

Dedicated Digital Display For Displaying Various Parameters.

User-programmable Feature Allows The User To Set Up To 9 User-defined Programs.

Auto Power On In Case Of Power Failure Where Equipment Starts Automatically And Runs For The Remaining Left Time.
